NanoProtector DIESEL with Cetane-Plus-Formula improves the properties of super-diesel-fuels. Suitable for all diesel- and turbo-diesel-engines.

NanoProtector DIESEL with Cetane-Plus-Formula:

- Raises ignition willingness
- Improves start behaviour
- The engine gets more power. It becomes more elastic and quieter, and knocks less
- Cleans injection jet, piston, combustion chamber and injection pump
- Protects from deposits and corrosion
- Prevents from burning-together and resinification of jet nozzles
- Helps obtain a complete, gentle, soft and fuel-saving combustion process
- Guarantees a finest distribution of the fuel
- Is advantageous to the environment through less smoke and soot emission

Application:

Add the content into the fuel. Mixes of itself.

For long-term function: sufficient for 20.000 km.

For preservation of engine and fuel system: Add 1% to diesel fuel.

* Store frost-free and in sealed off packaging * lightly flammable

*Keep away from children *Avoid contact with skin and eyes.
